Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is in response to applicant's amendment received on 10/02/07.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Camenzind (PCT WO 99/56918).

Camenzind discloses the invention including:

- Claim 1; a body 6, a blade 2, at least three mounting spindles (9, 10 and the pin [inherently disclosed] that supports the weight device 51), a weighing element 51, a measuring sensor 14.
- Claim 2; a transmission arrangement (inherently disclosed in Fig. 5).
- Claim 4; the weighing element is capable of moving transversely to the spindle by the weight of the load.
- Claim 15; the weighing element is foldable out of the body about at least one of the spindles (see Fig. 5).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Camenzind (PCT WO 99/56918) in view of Lechner (4,129,190).

Camenzind discloses the invention substantially as claimed except for a lever element. However, Lechner teaches the use of a lever element 10 for the purpose of transmitting the load result to the display device. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Camenzind by providing the lever element as taught by Lechner in order to obtain a device that transmits the load result to the display device.

Response to Arguments

6. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3724

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chmielewski et al., Reder et al. and Stanfield et al. are cited to show a related device.
